KOBIL presents highlights at CeBIT

First TAN generator worldwide with a touch screen

Hannover, Germany / Worms, Germany. 1 February 2010. KOBIL Systems GmbH is a manufacturer and market-leading trendsetter of mobile IT solutions in the area of digital identities. At the renowned CeBIT exhibition in Hanover, the newest products by KOBIL will be presented from 2 - 6 March 2010 in hall 11 (Banking & Finance) at booth D63. One of the new devices from the mIDentity line is mIDentity 4smart secure data storage, a future high security data storage device capable of cloud-computing. opTAN touch is the name of yet another innovation by KOBIL. It is the first optical chip card reader worldwide equipped with a touch screen. In addition, KOBIL will give the Golden TAN Optimus comfort Award to a savings bank at CeBIT to symbolize the one million TAN Optimus comfort devices that have already been delivered to the branch.

The opTAN touch, which will be presented to the public for the first time at CeBIT, offers even better ergonomics thanks to its new touch screen. This new addition to the device is KOBIL's reaction to modern day requirements for the design of IT security devices. But behind the smart design hides rock-solid security based on the technology of the TAN Optimus comfort optical reader.

The data storage device mIDentity 4 smart secure data storage, which is another development within the KOBIL mIDentity line, meets and exceeds current security concerns. The device enables the processing of sensitive data also in external environments. This feature will be of benefit especially to external employees, field representatives and tax consultants. Internally, the device protects companies against data theft. mIDentity 4 smart secure data storage is smart card based and equipped with 256 bit AES hardware encryption. The device can be managed centrally enabling document control and the conducting of automatic backups. If the data storage unit is attacked, the mIDentity automatically shuts itself down. In the future, the mIDentity 4smart secure data storage will also be able to conduct automatic backups that are stored in a cloud.

Last but not least, KOBIL will give the Golden TAN Optimus comfort Award to a savings bank at CeBIT. One million customers of the bank are already using the security device today.

Well-known partners of KOBIL will also be present at the exhibition demonstrating the everyday usage of KOBIL products that are already being deployed in the field.

Let KOBIL Systems surprise you once again how easy security can be and learn about the latest products – security made in Germany.

Besides SAP AG and Software AG, KOBIL is one of the winners of the Clusters of Excellence Competition of the German federal government, which will be providing over € 80 m for the research and develop of software solutions within the next five years to the software cluster "Software Innovations for Digital Enterprises". With the competition, the ministry wishes to support innovation policy goals in Germany. Partners from science and economy can more quickly convert their ideas into new products and services while at the same time using their

potential in a more effective way. KOBIL is a partner daring to be innovative for more than two decades and significantly contributing to IT security.

About KOBIL Systems

KOBIL Systems is a market leader and trendsetter in the production of mobile high security IT solutions in the area of digital identities. KOBIL stands for secure data, secure communication and secure authentication on every computer worldwide. Founded in 1986, the 100-strong KOBIL Group based in Worms, Germany, is the only manufacturer worldwide with a fully developed product line. As a pioneer in the area of cryptography, smart card technology and PKI (digital certificates), KOBIL's products have become today's recognized standard for digital identities and highly secure data technology. The development of the products is done in Germany with 40 percent of the staff involved in the development at the KOBIL headquarters alone. KOBIL applications comply with international standards such as EMV-CAP, ISO 7816, ISO 9001 and the German Act for Digital Signature. KOBIL products also support common technology standards making it very simple to integrate them into existing IT infrastructures. IT security solutions by KOBIL are mobile, flexible and user friendly, and are used in a variety of different industries. Businesses, banks and institutions such as Deutsche Telekom, Swisscom, RWE, T-Systems, DATEV, Commerzbank, Migros Bank, Valiant Bank, Hypothekbank Lenzburg, Rothschild Bank, UBS, YapiKredi Bank, Isbank as well as the German parliament and the German Federal Office for Information Security (BSI) rely on technologies by KOBIL.
